### Profile

As a Frontend Developer with over one year of commercial experience, I've gained proficiency in React, TypeScript, HTML, and CSS. I'm passionate about crafting exceptional user interfaces and have developed a deep understanding of web development principles.

In a dynamic startup environment, I have enthusiastically embraced change and rapidly acquired proficiency in new technologies, including React and Sass. My collaboration is seamless with cross-functional teams, such as developers, Q&A specialists, and designers.

I'm also expanding my skills in Node.js, with the goal of becoming a proficient full-stack developer. I'm excited to bring my technical expertise, adaptability, and passion for creating exceptional user experiences to a new opportunity.

### Professional Experience

#### Frontend Developer, *TheCake startup*

July 2022 – 2023 | London, UK

- Designing and implementing user interfaces for web applications using React, TS, HTML and CSS.
- "Maintaining the frontend of the website to ensure a smooth, user-friendly experience."
- Utilised GitHub for code collaboration, version control, and seamless integration of new features.
- Leveraged Jira for efficient project management, task organisation, and progress tracking.
- Actively participated in stand-up meetings to discuss tasks, provide updates, and address challenges.
- Collaborated with designers, backend developers, and stakeholders to ensure seamless frontend-backend integration.

#### Tesco, *Team Leader*

2014 | London, UK

- As a skilled team leader, **I successfully managed a diverse workforce of 30 to 300 employees, ensuring their well-being, motivation, and productivity.**
- Through effective performance monitoring and strategic rota management, **I optimised team efficiency and achieved targets. Improving team performance for 10% over past year.** My leadership fostered a culture of continuous improvement, bringing value to Tesco through high-performing teams and enhanced productivity.

### Projects

#### Mortgage Calculator (React, JavaScript, Material UI): [↗](#)

GitHub source code [↗](#) - A stylish Mortgage Calculator web app built with React.js and Material-UI. Users can calculate monthly payments and see total repayment.

#### Todo App (TypeScript, React, Fetch Api): [↗](#)

GitHub source code [↗](#) - application interacting with a server using the Fetch API, enabling the saving and retrieval of todos.

#### Employee table (JavaScript, HTML5, CSS3, DOM): [↗](#)

GitHub source code [↗](#) - a web app built with JS and (DOM) for managing employee data.

#### Bose landing page (HTML5, CSS3, SCSS preprocessor, BEM):

GitHub source code [↗](#) - a responsive landing page built using HTML, CSS, and SCSS, with all the styling and HTML code written by me.
